Introduction I am an interior designer with over two decades in the industry, focused on corporate and technical design. I am deeply interested in aligning my professional efforts with my personal values: practical problem solving, creative expression, and responsible stewardship of people and planet. Continuous learning is important to me, and toward that end I seek a work environment that encourages and nurtures that effort.

Certifications WELL Accredited Professional 2018
Fitwel Ambassador 2017
Certified Interior Designer (CID) 2008
LEED ID+C / Accredited Professional 2004
NCIDQ 1997

Proficiencies AutoCAD; Revit Architecture; Adobe CS suite

Work Experience *References upon request*
Portfolio *Link to samples; full portfolio upon request*

Senior Associate **Perkins+Will**
Sr. Designer / Project Mgr. Firmwide expert in healthier materials. Part of team leadership on science/
Research Director technology (including workplace and amenities) project types up to
2012 – 2019 360,000sf (\$7m fee); scope from strictly tenant improvement (labs and
office area) to central utility plant and site improvements. Manage and
produce tenant improvement projects for local and national accounts
(corporate TI). Management of staffing and contracts typical. Contribute to
projects certifying to LEEDv4 and WELL standards.

Other

- 2015 (Q4) – 2019 (Q4) Health Product Declaration Collaborative Board Member
- 2013 - 2018 Speaking Engagements: prepare, participate in, facilitate, and lead discussions on the topic of healthy materials and transparency of building products. Greenbuild, NeoCON, Living Product Expo, in-house training sessions, Parson's Healthy Materials Lab, AIA, and others.
- 2012 - 2017 Writings: prepare, edit, contribute, author various white papers, articles, and blog posts on the topic of healthy materials in the building industry. Published book, *EcoSoul: Save yourself and the planet by rethinking your everyday habits*.
- 2004-2011 Lecturer, Graduate Advisor, Adjunct Professor, variously at University of Berkeley Extension, Academy of Art University, San Francisco State University, Georgia State University
-

Education

- Bachelor of Design Interior Design, University of Florida
1995 Magna Cum Laude, School of Architecture
-

Design Statement

I believe in a holistic, interdisciplinary, team-oriented approach to design. Design integration that taps into everyone's expertise promotes innovation and enhances the overall project with true added value.

The successful design finds balance in the myriad priorities and blends all into a true solution that is larger than its parts.

I whole-heartedly agree with Sandra Mendler, principal with Mithun, who has said that as a society, and as a nation, we are "misusing our affluence." As a designer I am in a position to educate our clients, educate our consultants, and educate my colleagues and the public about why environmental design is responsible design. I am deeply moved toward this end, to actively search out what is truly the best solution (material, product, system, process) for the design problem at hand.

My creative process is a circling of ideas, spiraling in toward that unknown but imminent spark that drives the engine of the design industry. After the initial shuffling of thoughts, drawing and redrawing, the design emerges as a flag. Making the parti known and supported by the team is the real challenge. As a creative person, I tend toward the less-explored avenues of design; as a team-builder and natural mediator, I tend toward the practical. These tendencies of mine are often at odds; it is my personal challenge to allow my instincts to be heard; to make my ideas understandable to others; not to compromise too quickly.

To maintain my interest, motivation, and enthusiasm I strive to surround myself with other creative thinkers while being actively involved in challenging projects, always learning. Regular exposure to new ideas and other ways of looking at issues satisfies my constant curiosity about the world, while making me a better designer.
